(b) Students may drop subjects within seven (7) weeks of the commencement of the semester.

(4) Withdrawing From Subjects

(c) Students who have been allowed to withdraw are required to re-register for the subject in the next semester and pay the necessary fees.

4. CHANGE OF PROGRAMME

(1) Students who wish to change programmes may have their grades obtained for subjects in the previous programme transferred to the new programme. The grades will be counted in the computation of GPA and CGPA.

(2) Students may apply to change programme within two (2) weeks after the commencement of the semester. A payment of RM 50.00 (USD 15) is required for the application.

5. TYPES OF SUBJECTS

Subjects offered at different levels are as follows:

(1) Compulsory MQA Subjects

(a) Malaysian students are required to take these subjects as a condition to graduate. MQA (Malaysian Qualifications Agency) compulsory subjects are Bahasa Melayu (only for students who did not obtain a credit in the subject at SPM level), Pengajian Malaysia and Pendidikan Islam/Moral.

(b) International students will be exempted from these subjects and are to replace them with other elective subjects.

(2) Compulsory University Subjects

These subjects are deemed compulsory by the University. All students are required to pass these subjects before being eligible for graduation.
(3) Core Subjects of the University

Core subjects are designed to provide students with a basic knowledge and understanding in the areas of study pursued by the student.

(4) Specialisation Subjects

Specialisation subjects are designed to provide students with a broader knowledge and a deeper understanding of the subjects pertaining to their area of specialisation.

(5) Elective Subjects

Elective subjects are open to any student who wishes to register.

6. CREDIT TRANSFER

(1) Applying for Credit Transfer

(a) Students may apply for credit transfer for the purpose of obtaining an exemption from one or more subjects required by their programmes because they have taken and passed similar subjects of the same credit value in other institutions.

(b) Applications for credit transfer shall normally be made within seven (7) weeks of the first semester at the University for new students.

(c) Applications for credit transfer must be accompanied by the transcripts of examination results and syllabus or outline of the subjects pursued at the relevant institutions.

(2) The Principle of Credit Transfer

The principles for credit transfer are as follows:

(a) The institution from which credits for one or more subjects are to be transferred must be recognised by the University.

(b) Subjects from institutions recognised in (a) above, must be accepted by the University as credit transferable subjects.

(c) Subjects accepted for credit transfer by the University in (a) must be similar or close to one or more subjects offered in programmes by the University.

(d) The student must have obtained a pass in the subjects concerned.

(e) Credit transfer is applicable if the date of the result of the subject concerned was obtained within the last 5 years.

(f) Transferred credits will not be calculated in the GPA and the CGPA. Transferred credits will be taken into account to fulfill the total credit requirements for graduation.
(3) Maximum Number of Transferable Credits

The maximum number of transferable credits depends on the following conditions:

(a) The total credit hours of subjects exempted due to credit transfer must not exceed the credit hours of the subjects taken at other relevant institutions, after taking into account the relevant time taken for the subject at the relevant institution whether it is quarter semester, half semester or any other semester period.

(b) The maximum transferable credit is 30% of the credit hours required for graduation in a University programme. For example, if a University programme requires 120 credit hours for graduation, the maximum transferable credit allowed is 36 credit hours.

(4) University Subject Requirement

(a) For the Degree programme, a student shall only be awarded the Degree after completing the University subjects of at least 70% of the total credit hours required to graduate from a University programme.

(b) For example, a University Degree programme requires 120 credit hours for graduation. A student who has received credit transfer from other institutions is eligible for a Degree after completing 84 credit hours at the University.

7. GRADE SYSTEM

(1) Grade and Point Values

(a) A student's performance in a subject is indicated by the grade received. The relationship between the grade and the point value is as shown below:

<table>
<thead>
<tr>
<th>Mark</th>
<th>Grade</th>
<th>Point Value</th>
<th>Status</th>
</tr>
</thead>
<tbody>
<tr>
<td>80 – 100</td>

<td>1.00</td>

</tr>
<tr>
<td>0 – 34</td>
<td>F</td>
<td>0.00</td>
<td>Fail</td>
</tr>
</tbody>
</table>

(b) Passing Grade

The general passing grade in all subjects is a D and above except for MQA Compulsory subjects where the passing grade is a C and above. However the passing grade for each subject depends on the requirements of the School with the approval of the Senate of the University.
(c) Accumulating Points

(i) The points are counted by taking the total credit hours for a particular subject and multiplying it with the grade received for a particular subject. For example, a student who receives an A in Principles of Management which carries 3 credit hours receives 12 points for the subject (3 hours x 4.00 point value for an A)

(ii) The total points is the total of all points accumulated by students of all subjects taken in one semester as follows:

<table>
<thead>
<tr>
<th>Subject</th>
<th>Grade</th>
<th>Credit Hour (Counted)</th>
<th>Credit Hour x Grade Point</th>
</tr>
</thead>
<tbody>
<tr>
<td>Principles of Management</td>
<td>A</td>
<td>3</td>
<td>4.00 x 3 = 12.00</td>
</tr>
<tr>
<td>Principles of Marketing</td>
<td>B-</td>
<td>3</td>
<td>2.67 x 3 = 8.01</td>
</tr>
<tr>
<td>Principles of Finance</td>
<td>C+</td>
<td>4</td>
<td>2.33 x 4 = 9.32</td>
</tr>
<tr>
<td>Total Point</td>
<td></td>
<td>10</td>
<td>29.33</td>
</tr>
</tbody>
</table>

(d) Calculating the GPA and CGPA

(i) The Grade Point Average (GPA) is defined as the total grade points received by students in a semester divided by the number of credit hours counted in the semester. The Cumulative Grade Point Average (CGPA) is defined as the total grade points accumulated from all semesters divided by the total credit hours counted.

(ii) If a student has completed more than the minimum required number of credits for graduation, the CGPA be calculated based on the minimum required number of credits for graduation and which should include:

- All the core subjects
- The best grades obtained for the elective subjects.

(e) Repeating Failed Subjects

Students who obtain an F in any subject are required to repeat the subject. For the purpose of calculating the CGPA, the new grade will be counted.

(f) Repeating Subjects for Grade Improvement

Students are allowed to improve their grades by repeating the subject in the programme of their study. For CGPA calculation, the better grade will be counted.

(g) Other Status

Other than the Grades A, B, C, D, F, the following status are also used:

(i) “I” denotes Incomplete.

This status is awarded to a student who is unable to sit for an examination or is unable to complete assignments, like projects in the
time given due to illness verified by a Medical Officer or for other reasons with the approval of the Dean. (a) Structure I – Degree by Research

(b) Structure II – Degree by Coursework and Research

(c) Structure III – Degree by Coursework

(2) Structure I – Degree by Research

Students pursuing a postgraduate programme under this structure have to take a sustained and in-depth study on a particular research topic, which he will then write about in the form of thesis.
(a) A student undertakes research under the supervision of a Supervisor appointed by the Dean of School for Graduate Studies. The Supervisor will ensure that the student is making progress towards completing the research on time.

(b) Students may be required to audit some subjects before undertaking their research to strengthen the basic knowledge in areas considered necessary for the advancement of their research work.

(c) At the end of this programme, the student is required to submit a thesis for examination. The thesis must be defended in an oral examination and or viva voce examination.

(3) Structure II – Degree by Coursework and Research

A student pursuing under this structure is required to fulfill a minimum number of credit hours of coursework and examinations. Subject to the student’s performance in the coursework component and the approval of Dean of School of Graduate Studies, the student is allowed to proceed work on his research proposal.

(4) Structure III – Degree by Coursework

A student pursuing a postgraduate programme under this structure is required to attend seminar classes (or under exceptional circumstances are based on a prescribed mode of study). Assessment will normally be based on assignments and/or quizzes and/or presentations and a substantial project paper or case study. The student is required to fulfill the required number of credit hours prescribed and sit for written examinations in the subjects registered at the end of the semester.

3. PROGRAMME REGISTRATION

(1) Students who have been offered entry into the University are required to register within the period indicated in the letter of offer.

8. PROGRAMME EVALUATION

(1) Grading System

(a) Grade and Point Values

A student’s performance in a subject is reflected by the grade received. The relationship between the grade and the point value is as shown below:

<table>

</table>
(b) Passing Grade

The general passing grade in all subjects is a B and above.

(c) Accumulating Point

(i) The points are counted by taking the total credit hours for a particular subject and multiplying it with the grade received for a particular subject. For example, a student who receives an A in Principles of Management which carries 3 credit hours receives 12 point for the subject (3 hours x 4.00 point value for an A)

(ii) The total point is the total of all points accumulated by a student from all subjects taken in one semester.

(d) Calculating the GPA and CGPA

(i) The Grade Point Average (GPA) is defined as the total grade points received by students in a semester divided by the number of credit hours counted in the semester. The Cumulative Grade Point Average (CGPA) is defined as the total grade points accumulated from all semesters divided by the total credit hours counted.

(ii) If a student has completed more than the minimum required number of credits for graduation, the CGPA be calculated based on the minimum required number of credits for graduation and which should include:
   - All the core subjects
   - The best grades obtained for the elective subjects.

(e) Repeating Failed Subjects

A student who obtained F in any subject is required to repeat the subject. For the purpose of calculating the CGPA, the new grade will be counted.

(f) Repeating Subjects for Grade Improvement

A student is allowed to improve his grade by repeating the subject in the programme of their study. For CGPA calculation the better grade will be counted.

(g) Status Indicators Other Than Grades

Other than the A, B, C, D, F above, the following status indicators are also used to illustrate a student’s performance:

(i) “I” denotes Incomplete.
   This status is awarded to a student who is unable to sit for an examination or is unable to complete assignments, like projects in the time given due to illness verified by a Medical Officer or for other reasons with the approval of the Dean. The student who obtained the ‘I’ grade is required to sit for a supplementary examination as replacement for the initial examination or has to complete the incomplete assignment at a date to be fixed by the Dean. Appropriate time extensions will be
considered.

‘I’ status is also accorded to the following cases:
- Non submission of Assignment and absent from Final Exam
- Submission of Assignments only and absent from Final Exam
- Non submission of Assignments but sat for Final Exam.

(ii) IP = In Progress. This status is given to students who have completed the coursework of a subject but yet to sit for the final examination in the same semester. This status indicates the work progress of the students before a final grade is awarded in the later semester. A student is required to sit for the final examination within the next three (3) consecutive semesters and if he fails to do so, he needs to re-register for the subject.

(iii) CT = Credit Transfer. This status is given to students who have been granted credit transfers for certain subjects in accordance with the relevant regulations. In such cases, students will be regarded as having received the credit hours for the relevant subjects.

(iv) S or U = Satisfactory or Unsatisfactory. Research work is graded either as Satisfactory “S” or Unsatisfactory “U”. No point value is given to the research work and thus it is not computed in the cumulative or semester grade point average.

(v) W = Subject Withdrawal. This status is given to students who withdraw from a subject within the allocated time as provided for in 5 (4). The W status will not be calculated in the GPA.

(vi) AU = Audit. This status will be given to students who have registered for a subject but do not take part in the assessments.

The new examiners will examine the dissertation/thesis and submit the report to the Dean. The Post Graduate Committee shall decide the result based on the recommendations of the new examiners’ reports.

(9) For students pursuing under Structure II and III

Performance is assessed in the following manner:

(a) Continuous assessment through tests, assignments/project and quizzes. Normally, not more than 60% of the total mark can be allocated to this form of assessment.

(b) The end of semester examinations - is held comprehensively at the end of each semester for each subject taken. Normally not less than 40% from the total marks are to be allocated for the end of semester examinations.

(c) In special cases (with prior approval of the University), the end of semester examinations can be replaced with other forms of assessment like ‘mini project’, ‘term paper’ and others.

(d) Assessment via practical training must follow modes of assessment set by the School and approved by the University.

(10) End of Semester Examinations

(a) Final examinations must be held within the allocated time and in modes approved by the University.

(b) Students can apply to defer sitting for the examinations provided all continuous assessments have been submitted. Applications are to be made before the final examination week. The subjects will be graded as ‘In Progress’ (IP) until students sit for the examinations. Students will be allowed to sit for the examinations within the next three consecutive semesters. If he fails to do so, he needs to re-register for the subject.

(11) Announcement of Examination Results

(a) The examination results can only be released to the student concerned and to a party agreed to by the student in writing.

(b) Appeals for Re-marking of Assessment

(i) Appeals for remarking applies only to the examination component.
(ii) Appeals for remarking of the examination can be made by filling the ‘Appeal on Examination Grade’ form. A payment of RM 100 or equivalent in other currency is required for each remarking. Applications must be made to the Registry within 21 days of the announcement of the final examination results.

(iii) Upon appeals for remarking of the examination, a student can have a grade change from ‘Lower’ to ‘Higher’ grade or ‘Higher’ to ‘Lower’ grade.

(iv) In the event that the student has obtained a ‘Higher’ to ‘Lower’ grade upon appeal, a third examiner may be appointed to evaluate the final examination.

(v) The Senate shall consider all cases of appeal and reserves the right to reexamine any other portions of the assessment.

Guidelines for the Writing of Thesis, Dissertation and Project Paper for Postgraduate Programmes
GUIDELINES FOR THE WRITING OF THESIS, DISSERTATION AND PROJECT PAPER FOR POSTGRADUATE PROGRAMME

1. INTRODUCTION

These guidelines provide students with essential information about how to prepare and submit thesis and dissertations in a format acceptable to the Graduate School at Asia e University. As you begin the process of writing, you will be carefully documenting the research, theories, methods, results and conclusion of your efforts. A well-written and well-formatted work will reflect favourably upon you and Asia e University Graduate School. When completed, your thesis or dissertation must follow a format and style that are acceptable, consistent with your field of knowledge.

2. STRUCTURE OF THE POSTGRADUATE PROGRAMME

The postgraduate programmes offered by the University are categorised under three (3) structures as follows;

(1) Structure I : Degree by Research (e.g.: PhD, MSc)
(2) Structure II : Degree by Coursework and Research (e.g.: DBA)
(3) Structure III : Degree by Coursework (e.g.: MBA, MM, MKM, MEd, MICTM)

3. THESIS, DISSERTATION AND PROJECT PAPER

A thesis, or a dissertation or a project paper represents the research component of the postgraduate programme.

At Asia e University, a thesis contributes to 100% fulfilment of the degree programme through original research under a proper academic supervision and in a research environment for a prescribed period. In scope, the PhD thesis differs from a research Master thesis mainly by its deeper and more comprehensive treatment of its content and subjects. The length of the PhD thesis varies with each discipline with 80,000 words being the norm. The PhD thesis should not exceed 100,000 words (excluding appendices) without special approval of the Dean, School of Graduate Studies. The length of a master thesis also varies with each discipline and should not exceed 80,000 words (excluding) without the approval of the Dean, School of Graduate Studies. The thesis must be defended in an oral examination and/or viva voce examination.

A dissertation or a project paper contributes to a partial fulfilment of the postgraduate degree by research under a proper academic supervision and in a research environment for a prescribed period. Without the approval of the Dean, School of Graduate Studies, the length of a doctoral dissertation and master dissertation should not exceed (excluding appendices) 80,000 and
60,000 words respectively. The length of a 3-credit **project paper** should not exceed 12,000 words (excluding appendices).

The thesis, or dissertation or project paper demonstrates authority in the candidate’s field and shows evidence of command of knowledge in relevant fields.

*Intent of Research*

Before a supervisor can be appointed, a student needs to submit a 2-page of Intent of Research to SGS by indicating the following:

(a) proposed title and scope of study,

(b) brief statements of research problems,

(c) conceptual framework (e.g. the variables involved, methods used in brief)
(d) reasons for undertaking the study (e.g. career enhancement, academic requirement, self-fulfilment)

(2) **Supervisor**

The School may assign a suitable supervisor after admission or the student may nominate his/her own supervisor by submitting a Form SGS 001 Nomination of Supervisor, proposed supervisor's full CV and intent of research to deansgs@aeu.edu.my.

A student with the advice of the Supervisor may nominate a Supervisory Committee (if required). If a Supervisory Committee is required, the student must complete and submit a Form SGS 001 Nomination of Supervisor to deansgs@aeu.edu.my.

A Supervisory Committee must consist of a Chairman and at least one other member who is capable of providing advice and guidance to the student's research.

The Chairman of the Supervisory Committee may be the Supervisor or any other academic member appointed by the School.

(3) **Additional Requirements for Appointment of Supervisor(s)**

The nominated Supervisor / Supervisory Committee for Master's student may also be one of the following persons:

(a) An academic staff member who is a Doctoral degree holder; or

(b) An academic staff member with the rank of a Lecturer with a Master's degree qualification and has published his research; or

(c) An individual with relevant postgraduate or professional qualification recognised by the University.

Whereas, Supervisor / Supervisory Committee for a student pursuing a Doctoral degree may be one of the following persons:

(a) An academic staff member who is a Doctoral degree holder; or

A student is requested to discuss his/her research progress with his/her supervisor and submit a half-yearly progress report (Form SGS 002 Thesis Dissertation Progress Report) to deansgs@aeu.edu.my by the first week of January and the first week of July of each year. This is a part of monitoring process and the SGS shall act for improvement based on the progress analysis report.

5. **PROPOSAL DEVELOPMENT AND APPROVAL**

(1) **Requirement**

During the Stage 1 of Structure I, the research proposal should be submitted within the stipulated period from date of registration of the first semester to the School of Graduate Studies.

For Structure II, a student is required to fulfil a minimum number of credit hours of coursework and examinations. Subject to the student’s performance in the coursework component, and the approval of Dean of School of Management, a student is allowed to proceed work on his/her research proposal.

(2) **The Purpose of the Research Proposal**

The purpose of this proposal is to clearly set out the following:

(a) goals of the research study
(b) relationship of the work to the current body of knowledge in the chosen discipline area
(c) methodologies by which the goals will be addressed
(d) plausible outcomes of the work, together with their significance, and
(e) candidate’s capabilities in conducting the research together with the timeline

(3) Preparation of the Research Proposal

Candidates should conduct an initial literature search and review the existing literature concerned with content and methodology. This is the most critical activity before writing the research proposal. The better the research is ‘grounded in’ or ‘tied to’ the literature, the greater will be its credibility, persuasiveness and authority.

Candidates are required to discuss with their supervisor or supervisory committee member(s) on the focus and purpose of the research proposal as stipulated above.

A Doctoral research proposal should normally be around 10,000 words excluding appendices and references, whereas a proposal for Masters’ degree programme (Structures I and II) normally comprises about 8,000 words.

For Structure III, a simple research proposal of about 300 words is required for Masters’ programme by Coursework. This proposal should include the title, purpose(s) of research and methodology used.

(4) Submission Process

After student prepared the proposal with the consultation of the Supervisor(s), students are require to submits final copy of the proposal to SGS at deansgs@aeu.edu.my together with Form SGS 003 Submission of Thesis Dissertation Proposal and power point slides at least one month before the vetting process.

(5) Table of Contents of Research Proposal

The table of contents for the research proposal shall consist of the following;

(a) Synopsis
   This section is the ‘face’ of the proposal. It is written to give an overview of the context, purpose, objectives, justifications for research, expected results and what makes the research a useful contribution to knowledge.

(b) Introduction
   (i) Background of study
      Should arouse interest and convince the reader that the research is justifiable and the problem is worth researching.

   (ii) Problem Statement
      This is a statement that clearly defines the ‘problem’ the intended study is going to answer. It has to be well framed - clear, precise, specific, measurable and attainable.
(c) Research Purpose and Objectives
   (i) Research Purpose
       This section provides the focus of research. Researcher must state the purpose of the research, and it must be anyone or a combination of these – to explain, to explore, to predict or to describe.

   (ii) Research Objectives
       The objectives detailed the reasons why the research is being carried out. It also provides the scope and parameters within which the study will be conducted. Objectives set must be SMART (specific, measurable, attainable, realistic and time bound).

   (iii) Justifications
       If in the ‘Background’ section you provide an ‘overall’ reason why the research is significant and merits a more detailed investigation, this section requires you to justify why the research is necessary in the context of the purpose and objectives you had stated above.

(d) Review of Literature
   (i) Issues Addressed
       This is the first thing to identify in the literature review where it is needed to identify areas or issues where they had not ventured into. If you are interested in an issue but others have done some work on it, then look for past findings that you can improve on and add new dimensions.

   (ii) Methods Employed
       ▪ Guiding theory(ies) used.
       ▪ Conceptual frameworks used / approach adopted, variables used to represent the concepts being studied, scales and measurement used, how variables are being measured and major hypothesis being tested.
       ▪ Data Collection instruments employed.
       ▪ Respondents used in the study.
       ▪ Sampling.

   (iii) Major Findings and Research Gaps Identified.

(e) Research Methods
   (i) Operational definitions of main concepts and variables to be used.
   (ii) Guiding theory(ies) to be used as a basis of informing the research.
   (iii) Conceptual frameworks to be used / approach to be adopted.
   (iv) Variables used to represent the concepts being studied.
   (v) Scope of the study.
   (vi) Major hypothesis being tested.
   (vii) Scales and measurements to be used and how variables are going to be being measured.
   (viii) Data Collection instruments to employed and data collection plans.
   (ix) Who are the respondents, how they are going to be selected, how sampling is going to be done.
(x) Data analysis – how data is going to be analysed. This includes what statistical techniques are going to be used for data analysis and to test the validity and reliability of data and to explain/interpret the results expected to be obtained.

(f) Implications and Limitations
This should consist of expected results from your study, its implication in the context of ‘extending the frontier of knowledge, and limitations you might encounter that will affect your data collection, analysis and findings.

(g) References
*Use the APA format.*

(6) Research Proposal Defense

In the proposal defense session, student must formally defend the research proposal to the Proposal Defense Committee. During the session, the students need to present the proposal, including the problem identification, background literature and rationale for study, hypotheses, procedural details, analysis plan, and expected limitation. This is the time for dialogue between the student and the committee in order to clarify any questions, discuss and negotiate any suggested modification, recommend resources, and provide support to the research efforts of the student.

SGS tables the appointment of Readers of Proposal Defense Session for approval in Postgraduate Studies Committee (PSC) meeting. The tasks of the Readers are to attend the Proposal Defense Session, critically review and evaluate the proposal and sign the approved proposal.

6. DATA COLLECTION

(1) Permission to Gather Data from Relevant Authorities

A candidate is requested to seek the permission from the relevant bodies of each country that approves the conduct and the ethical considerations of the research before the candidate is allowed to embark onto the proper data gathering procedures. The letters of consent from the relevant authorities must be disclosed to the supervisor(s) and attached in the thesis as appendix.

(2) Informed Consent and Protection from Harm

Perhaps the most basic and important ethical issues in research are concerned with participants’ right to informed consent and freedom from harm. Researchers obtain *informed consent* by ensuring that research participants enter the research of their free will and with the understanding of the nature of the study and any possible dangers that may occur. This requirement is intended to reduce the likelihood that participants will be exploited by a
researcher persuading them to participate when they are not fully aware of what the study’s requirements are.

Researchers must ensure *freedom from harm* by not exposing participants to undue risks. This requirement includes issues of confidentiality (protecting participants from ridicule or embarrassment) and issues related to personal privacy. Collecting information on participants or observing them without their knowledge or without appropriate permission is considered unethical. Furthermore, any data or information that are gathered, either from or about a person, should be strictly confidential. Access to data should also be limited to persons directly involved in conducting the research.

(3) Authenticity of Data

The researcher must declare that the thesis is his/her own work and that all contributions from any other persons or sources are properly and duly cited. The researcher further declares that it does not constitute any previous work whether published or otherwise. Candidate and supervisor(s) have the obligation to ensure the authenticity of data.

Data must normally be kept in a safe place with a proper security and for at least two years. Original data must be made available if requested to show evidence of authenticity.

PUBLICATION AND AUTHORSHIP

(1) Publication

A student may choose to submit parts or the entire thesis as a series of related papers, or manuscripts intended for publication. This requires prior consent of the supervisor/supervisory committee and appropriate copyright permission. The paper(s) will normally form one or more well defined thesis chapters; details of organization and content are determined by the student and the supervisory committee. The publication status (submitted, in revision, in press, or published, with dates) and book or journal details (volume, page numbers, etc.) of any manuscripts or papers included in the thesis must be specified with each such chapter.

(2) Authorship

Single or multiple names of authorship is permissible in the publication, provided that the student has made a substantial contribution to the work. Academic unit guidelines may specify the number and/or order of authors in accordance with discipline practice. The student's contribution to both the research and the writing of any multi-authored paper must be clearly specified either in the introduction to the thesis or at the beginning of each relevant chapter.

SUBMISSION OF THESIS / DISSERTATION

A candidate is required to submit the Form SGS 007 Notice of Submission of Thesis Dissertation, Table of Contents (TOC) and Abstract of the dissertation/thesis to SGS at deansgs@aeu.edu.my at least three (3) months before the actual date of submission of thesis / dissertation.

The submission has to be completed during the term of candidature. An unbound copy of the thesis/dissertation shall be submitted to SGS to be checked for conformity to the format requirements. Next, 5 soft bound copies of the completed dissertation/thesis and power point slides must be submitted to the SGS for examination purpose.

RESEARCH ETHICS

Research Ethics involves all the moral and professional issues relating to research. The most serious breach of ethical standards in writing research report / dissertation / thesis is the offence of plagiarism: the expropriation of then intellectual property of another. Plagiarism is defined as the use of original work, ideas or actual texts created by others, without acknowledging the original source. Such acknowledgement should be made by:

The use of ideas or words of others must be acknowledged individually in the text. In addition, each of the work consulted has to be included in the ‘references’ or selected bibliography.
If the quoted citation contains more than four sentences, it should be placed within a paragraph of its own with a 1 cm indentation. For example:

*The general theory of relativity, on its own, cannot explain these features or answer these questions because of its prediction that the universe started off with infinite density at the big bang singularity. At the singularity, general relativity and all other physical laws break down: one couldn't predict what will come out of the singularity (Hawking, 1988:122).*

If only part of the quotation is cited, the citation should be marked with an ellipsis (...), for example:

*There must be give and take, with the teacher being a participant as well as leader and..., a source of answers' (Sizer, 7984:9).*
