I have been teaching Bahasa Malaysia to primary school children for 27 years and I have always loved what I am doing. I constantly make efforts to keep up with best practices in teaching Bahasa Malaysia as a main language and believe that learners should be given individualised instruction to succeed.

It was the blessings and encouragement from my husband and four children that finally got me registered with AeU to pursue the Bachelor of Education ((Teaching Malay Language in Primary School) (Hons) in March 2012.

My journey as an adult learner had been most challenging having to juggle between work, family and studies. Despite my challenges, I found comfort with the support accorded to me by various friendly academic facilitators and staffs at AeU. This has inevitably inspired me to push forward with the determination to complete my studies.

I found the e-learning pedagogy adopted by AeU very convenient, giving me the flexibility in accessing learning materials, discussing online anytime and anywhere. One must always plan well with good time management and disciplines to their dream goals. My learning experience at AeU had broadened my perspective in teaching Bahasa Malaysia and also provided me with new insights on how children learn.

It had been a long and arduous journey for me but certainly a very rewarding experience. I owed my success to the constant support of my family and my classmates whom I enjoyed interacting with and treasured their friendships. I strongly believe one must not only work hard but also work smart to achieve success. I would encourage other adult learners to pursue lifelong learning for self-development and or to enhance their careers. I intend to continuously improve and pursue post graduate studies to further upgrade my qualification.
